

## IMAGE PRE-PROCESSING

### Define The Parameters /Arguments For Image Data Generator Class

```
import keras from keras.preprocessing.image
ImageDataGenerator
#Define the parameters/ arguments for ImageDataGenerator class train_datagen=
ImageDataGenerator (rescale=1./255,shear_range=0.2, rotation_range=180,
zoom_range=0.2, horizontal_flip=True)

test_datagen= ImageDataGenerator (rescale=1./255)
```
